SHILPA G
Software Tester

PROFESSIONAL SUMMARY

Highly skilled Automation Tester with over 4 years of experience in designing, developing, and executing automated test scripts using tools like Selenium, TestNG, JUnit, Cucumber, and Postman. Proven expertise in Agile environments with strong knowledge of the software development life cycle (SDLC) and software testing life cycle (STLC). Adept at creating robust test frameworks and ensuring high-quality software delivery.

PROFESSIONAL EXPERIENCE

Mphasis Limited

August 2021 – Present
Senior Software Engineer
Bangalore, India

- **Client: Charles Schwab**

Project 1: Stock Plan Services
Tech Stack – Java, Selenium, Cucumber, Bruno
Responsibilities:

- Created and executed automated test scripts using Java, Selenium and Cucumber BDD framework to ensure thorough testing of software applications.
- Automated regression testing to reduce testing time and effort, improving overall testing efficiency
- Automated UI test cases to ensure thorough testing of software applications' user interfaces.
- Ran automated UI tests regularly, reported defects, and tracked test results
- Validated UI functionality, layout, and user experience across different browsers, devices, and platforms.
- Reported UI-related defects and tracked them until resolution, collaborating with development team to resolve issues.

- **Client: Goldman Sachs**

Project 1: QA Mosaic Performance Suite
Tech Stack – Java-8, Gatling
Responsibilities:

- Utilized Gatling for performance testing of web applications and APIs
- Created simulation-based tests to mimic real-user behavior
- Developed and executed Gatling scripts to test system performance under various loads
- Analyzed test results to identify performance bottlenecks and provided recommendations for improvement
- Used Gatling's reporting features to track test results and identify areas for optimization

Project 2: Mosaic Service Automation
Backend Tech Stack – Java, RESTful web services, SQL, Mongo DB, TestNG framework

SKILLS

- ✓ Java
- ✓ Java-8
- ✓ Automation Testing
- ✓ SQL
- ✓ MongoDB
- ✓ Gatling
- ✓ JIRA
- ✓ Bruno
- ✓ GIT
- ✓ Postman
- ✓ TestNG
- ✓ Cucumber
- ✓ Selenium
- ✓ Eclipse
- ✓ Jenkins
- ✓ HTML
- ✓ MySQL
- ✓ RDBMS
- ✓ Apache Tomcat
- ✓ Windows

Responsibilities:

- Designed and developed automated API tests using TestNG framework
- Created test cases for API endpoints, including GET, POST, PUT, and DELETE requests
- Utilized TestNG annotations (@Test, @BeforeSuite, @AfterSuite) to structure and execute test cases
- Implemented data-driven testing using TestNG's DataProvider feature
- Conducted API testing for RESTful web services, ensuring functionality, security, and performance
- Analyzed test results, identified defects, and reported issues to development team
- Collaborated with development team to resolve API-related issues and improve overall quality

Personal Strengths

- ✓ Quick learner with ability to adapt to new technologies, tools, and methodologies, ensuring seamless integration with existing workflows.
- ✓ Collaborative team player with ability to work effectively with others, share knowledge, and contribute to team success."
- ✓ Strong technical skills in automation testing tools and frameworks, with ability to apply technical knowledge to solve complex problems
- ✓ Committed to ongoing learning and professional development, staying up-to-date with latest trends and technologies in automation testing
- ✓ Strong focus on delivering high-quality results, with emphasis on ensuring thorough testing and validation of software applications

EDUCATION

Master of Computer Applications (MCA) 2018-2021
(CGPA – 8.75)
RV College of Engineering Karnataka, India

Bachelors of Computer Applications (BCA) 2015-2018
(CGPA – 8.2)
Acharya Institute of Graduate Studies Karnataka, India

LANGUAGES

- ✓ English
  Fluent
- ✓ Kannada
  Native
- ✓ Telegu
  Intermediate

HOBBIES

- ✓ Dance
