CAREER PROFILE

Java Backend Developer with **7.5 years of experience** in designing, developing, and deploying **scalable, high-performance backend applications** using **Java**, **Spring Boot**, and **Microservices**. Strong expertise across **Telecom, Retail and eCommerce** domains with a proven ability to build reliable APIs, optimize application performance, and deliver end-to-end solutions. Skilled in **RESTful services**, **cloud environments**, and **SQL databases**. Adept at working in **Agile/Scrum** teams and applying **clean architecture, design patterns, and best coding practices** to ensure quality and maintainability.

EXPERIENCE SUMMARY

- 7.5 years of IT experience including 4+ years in Java, Spring Boot, and Microservices development and 3.5 years in telecom Billing systems using C.
- Experienced in architecting, designing, and developing enterprise-grade applications using Java, Spring Boot, Microservices, and C.
- Design and developed 15+ Restful APIs using Spring Boot.
- Proficient in building scalable RESTful APIs, Microservices, and web applications using modern backend frameworks
- Involved across all phases of the Software Development Life Cycle (SDLC), including requirement analysis, functional design, testing, and validation.
- Strong experience in debugging, performance optimization, and improving application stability.
- Experienced in handling production support, root cause analysis (RCA), and implementing permanent fixes for recurring issues.
- Reduced recurring production defects by 30% through root cause analysis and permanent fixes.
- Hands-on experience with REST and SOAP web services integration.
- Proficient in version control tools such as SVN, Git, GitHub, and Perforce.
- Good working knowledge of Linux/Unix environments and command-line operations.

TECHNICAL SKILLS

- **Languages:** Java 8 /11, C, SQL
- **Backend Technologies:** Spring Boot, Spring MVC, Hibernate, JPA, Microservices, Rest API
- **Cloud & DevOps:** AWS (S3, SQS, API Gateway, Code Deploy, Maven)
- **Databases:** MySQL, Oracle
- **Tools:** Git, GitHub, Perforce, Maven, IntelliJ, Postman, STS, Service Cafe
- **Concepts:** OOPS, Design Patterns (Singleton, Factory), Multithreading, Exception Handling

PROJECT EXPERIENCE

Organization: COGNIZANT — June 2022 to present

Designation: Software Engineer
Project: MacDonalds Global Sales (Feb2024-present)

Responsibilities:

- Designed and maintained scalable RESTful APIs using Java, Spring Boot, and Microservices architecture handling global sales transactions.
- Integrated AWS services such as SQS, S3, API Gateway, and CodeDeploy to develop and deploy cloud-based applications.
- Identify recurring issues or functional gaps, gather customer feedback, and communicate insights to Product Management and Engineering teams.
- Collaborated with cross-functional teams to analyze business requirements and translate them into technical solutions, ensuring alignment with company objectives.
- Perform RCA for production issues and reduced incident recurrence.

Organization: COGNIZANT

Designation: Software Engineer
Project: Walmart (Global Logistic System) (June2022-Jan2024)

Responsibilities:

- Spearheaded the development of Ecommerce applications using Java and Spring Boot, delivering features such as smart-slotting, authentication, and order processing.
- Implemented best practices for code optimization and database performance.
- Assisted in the integration of third-party APIs, enhancing the platform's functionality, and extending its capabilities.
- Engage in design discussions to gather user requirements and define technical specifications.
- Provided bug fixes and enhancements for GLS Classic Area, improving system reliability.

Organization: CSG INTERNATIONAL — Oct′ 2020 to May 2022

Designation: DEVELOPMENT CONSULTANT(Singleview)
Project: Inmarsat and Mastercard.

Responsibilities:

- Involved in analysis, design, and development and testing in singleview application.
- Prepares all monetary charges, payments, adjustments, total amount due for periodic bill or invoice.
- Identified any issues that may affect billing and determined the proper course of action.
- Engage in design discussions to gather user requirements and define technical specifications.
- Supported programming changes during quality assurance, user acceptance testing, and post implementation.
- Develops, modifies, debugs and maintains functional, non-functional, technical design specifications.
- Performing DA load, RT, AT creation and function writing in EPM language.

Organization: AMDOCS **Oct 2018 to sept 2020**

Designation: Associate Software Engineer (Ensemble)
Project: ENSEMBLE (Customer Service Management & Billing)

Responsibilities:

- Involved in analysis, design, and development and testing in CSM area.
- End to End ownership for all for the design and development activities.
- Supported programming changes during quality assurance, user acceptance testing, and post implementation.
- Hands-on experience with REST and SOAP Web Services.
- Developed and maintained robust applications in the Telecom domain using Java, Spring Boot, and C, contributing to enhanced network performance and improved customer experience.
- Conducted code reviews and mentored junior developers, fostering a culture of continuous learning and knowledge sharing within the team.
- Develops, modifies, debugs and maintains functional, non-functional, technical design specifications.
- Analyzing and providing code fixes for the issues/defects reported in CSM area.

EDUCATIONAL QUALIFICATION

- Bachelor of Engineering (Information Technology) with 66.67%, Medicaps Institute of Science and Technology, Indore.
- CBSE Senior Secondary School Certificate Examination with 72.6%.
- CBSE Secondary School Certificate Examination with 74.1%.
