Skills & Abilities

- **Development** – C#, ASP .Net, .Net Framework, .Net Core, Rest API's, MVC
- **Design** - Design Principles and Clean code
- **Cloud** - Amazon Web Services and Microsoft Azure
- **Databases** -Distributed, Relational - Non-Relational (Elasticsearch, MySQL, DynamoDB, PostgreSQL)
- **Architecture** - Containerization, Microservices, and event-driven, Port and Adapter architecture
- **DevOps** – CI/CD, Azure Repos
- Agile methodologies, Scrum

Work Experience – 6 Years

Epam Systems, Bengaluru

July 2023 – Present

- **Development:**
 - Developed APIs to act as a single source of truth, gathering data from multiple sources, ensuring data integrity, and applying validation and transformation.
 - Mapped transformed and validated data to DynamoDB models using Auto Mapper and wrote the data to DynamoDB, returning the partition key as a response.
 - Created middleware to capture "as reported" data before applying any validation or transformation.
 - Implemented SQL lookups to cross-check the validity of data.
 - Converted APIs into asynchronous Lambda services, integrating SQS, SNS, S3, and Elastic Cache.
 - Used Fluent Validation for Validating Models for better code maintenance.
- **Deployment:**
 - Updated existing YAML files to enable CI/CD pipelines for the codebase.
 - Automated deployment processes to ensure smooth delivery of developed features.
- **Role Ownership:**
 - Took full responsibility for assigned work, from development to deployment, ensuring timely delivery as per sprint planning.
 - Actively participated in refinement sessions, providing suggestions and clarifications during calls.
- **Team Support:**
 - Assisted team members in completing their tasks during critical times.
 - Conducted knowledge-sharing sessions to upskill the team.
 - Created detailed documentation for tasks performed to help the team with onboarding and references.
 - Supported the team during low capacity by stepping in to meet deadlines.

Cognizant Technical Solutions, Pune

July 2022 – June 2023

- Gained understanding on developing Microservice applications.
- Developed Use cases as per the asked requirements.
- Created pretty UIs in Angular enriched by CSS and Bootstraps.
- Followed MVC rules to write Business logic in Business logic layer.
- Developed APIs for flow of data from DB to UI or vice versa.
- Published APIs and client apps on Azure.
- Integrated Microsoft Authentication using Azure Active Directory and JWT.
- MySQL used to store data POST from the UI.

Mindtree Pvt Ltd, Pune

October 2019 – July 2022

- Use ASP .Net Framework and Core to develop applications for project environment.
- Conduct user requirements analysis to design and program application and deliver support for system enhancements.
- Play a pivotal role as a part of team, developing new applications using ASP .Net backend.
- Enhanced the quality of code and improved application performance.
- Created interactive UI's that surpassed client objective and improved user experience.
- Use CSHTML to add new UI requirements to the page.
- Debugged functionalities of MVC projects
- Debugged PowerShell scripts to fix the errors and to add new functionality.
- Consult with customers about project requirements and technical concern.

Certificates

- Microsoft Certified: Azure Fundamentals

Education

Acropolis Technical Campus, Indore, MP

2015 - 2019

Bachelor's Degree – Computer Science

CGPA – 6.8
