SUMMARY

Full Stack Engineer with **6.5+ years of experience** in designing, developing, and deploying scalable, high-performance web applications using **React.js, Next.js, TypeScript, Node.js, Python, and FastAPI**. Demonstrated expertise in frontend architecture, microservices, RESTful API development, and cloud-native solutions that use **AWS and Docker**. Developing and maintaining maintainable, reusable, and performance-driven applications while collaborating within SAFe Agile environments to deliver enterprise-scale software solutions.

TECHNISKILLS

Frontend	JavaScript, React.js, Redux, TypeScript, Next.js
Backend	Python, Node.js, Express.js, FastAPI, REST APIs
Database	MySQL, MongoDB
DevOps and Cloud	Docker, AWS, GCP

WORK EXPERIENCE

Sopra Steria Nov 2024 - present

Module Lead

- Engineered scalable full-stack applications using React.js, FastAPI, and Python, enabling real-time data processing and seamless integration across enterprise systems.
- Designed and developed reusable, modular React components and shared UI patterns, **improving maintainability, reducing code duplication**, and accelerating feature delivery across teams.
- Designed and implemented **Python-based connectors for ARAS Innovator PLM system**, enabling automated data exchange and synchronization with internal business platforms.
- Architected client-side routing and dynamic rendering strategies using **React Router for high-performance** single-page applications (SPA) with optimized user navigation flows.
- Implemented secure authentication and authorization mechanisms using **JWT**, strengthening application security and enforcing role-based access control.
- Developed and deployed high-performance RESTful microservices using FastAPI and asynchronous Python frameworks, **improving API responsiveness by 30% under concurrent workloads**.
- Built asynchronous and non-blocking backend services using **asyncio and httpx**, significantly enhancing throughput and scalability for API-intensive operations.
- Mentored engineers, led code reviews, and enforced engineering best practices in clean code, testing standards, and Git-based workflows, **improving overall code quality and team productivity**.
- Containerized and deployed distributed applications using Docker, enabling **reproducible environments and streamlining deployment** workflows across development and production systems.
- Designed and implemented Python-based integration connectors for **ARAS Innovator PLM**, automating enterprise data synchronization and improving interoperability between internal platforms.
- Engineered resilient API communication layers with robust retry, **exception handling**, and fault-tolerance mechanisms, ensuring reliable large-scale data exchange processes.
- Optimized application performance by **lazy loading components, memoizing functions**, and using **React Profiler** for performance tuning.

Senior Software Engineer

- Designed and developed scalable full-stack applications using **Python, Node.js (Express.js), React.js, and Next.js**, delivering reliable and high-performance solutions across enterprise-scale platforms.
- Architected reusable and modular frontend systems using React.js (Hooks, Context API, Redux), **improving UI consistency and increasing development efficiency by 35%.**
- Architected reusable frontend systems using **React.js, Hooks, Redux, and Context API**, improving maintainability, accelerating feature delivery, and enhancing UI consistency across applications.
- Built and optimized backend services and RESTful APIs using **Python and Node.js**, enabling scalable data processing, asynchronous workflows, and efficient service-to-service communication.
- Optimized backend services by refactoring APIs, introducing caching strategies (Redis), **and improving database query performance, reducing response latency by up to 30%.**
- Built high-performance **Next.js** applications leveraging Server-Side Rendering (SSR) and Incremental Static Regeneration (ISR), improving SEO, initial load time, and user experience for high-traffic applications.
- Collaborated with DevOps and platform engineering teams to deploy containerized applications using **Docker, AWS, and CI/CD pipelines**, improving deployment reliability, release efficiency, and operational stability.

Wipro

Oct 2021 - Mar 2022

Project Engineer

- Utilised JavaScript frameworks for developing scalable and responsive web applications, **improving website speed by 25%.**
- Integrated third-party APIs and services to enhance application functionality and user experience, including payment gateways and social media integrations.

BoldTek

Sept 2019 - Oct 2021

Software Developer

- Built and maintained a reusable company-wide UI component library **using JavaScript and React**, standardizing frontend development and improving engineering productivity by 60%.
- Optimized frontend performance by implementing code-splitting and bundle optimization techniques, **reducing bundle size by 60% and improving application load time.**
- Developed and enhanced user-facing features for a complex SaaS platform using **React.js and TypeScript**, improving usability, performance, and overall user experience.
- Integrated RESTful APIs and third-party services including authentication systems and payment gateways, **enabling secure and seamless end-to-end application workflows.**
- Implemented automated testing strategies using Jest, increasing test coverage, improving release confidence, **and reducing production defects by 30%.**
- Collaborated closely with **backend engineers, product managers, and stakeholders** to translate business requirements into scalable technical solutions and ensure smooth feature delivery.

EDUCATION

2015 - 2019 Bachelor's of Technology(Computer Science and Engineering) at **Gauhati University Institute of Science and Technology.** (CGPA: 8.3/10)
